

Hunter Electrical Opportunity Report

Every development application, complying development certificate and construction certificate lodged with the five Hunter councils in the fortnight to 21 September 2026 — scored, filtered, and turned into a call list.

Coverage Newcastle · Lake Macquarie · Maitland · Port Stephens · Cessnock **Period** 7 September 2026 to 21 September 2026

Source NSW Planning Portal ePlanning open data (CC-BY)

NEW OR UPDATED 1,100 projects across five councils in the 14 days to 21 Sep	WORTH ACTING ON 21 5 high priority, 16 medium — the rest is filtered out for you	VERIFIED CONSTRUCTION VALUE \$849.54m declared cost, cross-checked against floor area and dwelling counts	ESTIMATED ELECTRICAL SHARE \$62.6m+ range \$62.6m – \$107.8m; an estimate, not a quote	BUILDERS NAMED 129 certificates that name the building company, so you know who to ring
--	---	--	---	--

Ring these this week

12 PROJECTS · CERTIFICATE STAGE

These have passed the certificate stage, which means the builder is appointing trades right now or has just done it. This is the shortest window in the whole pipeline and the only

section where a phone call this week changes the outcome. Where the certificate names the building company, we have printed it.

The fortnight in numbers

1,100 PROJECTS ANALYSED

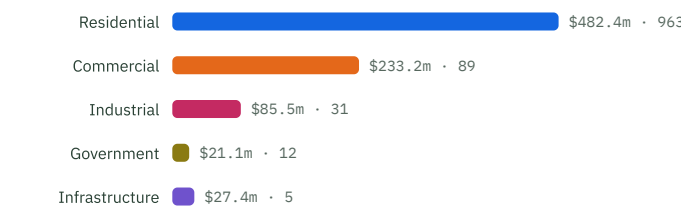

Where the money is, by council

Verified construction value this fortnight, then project count.

Where the money is, by sector

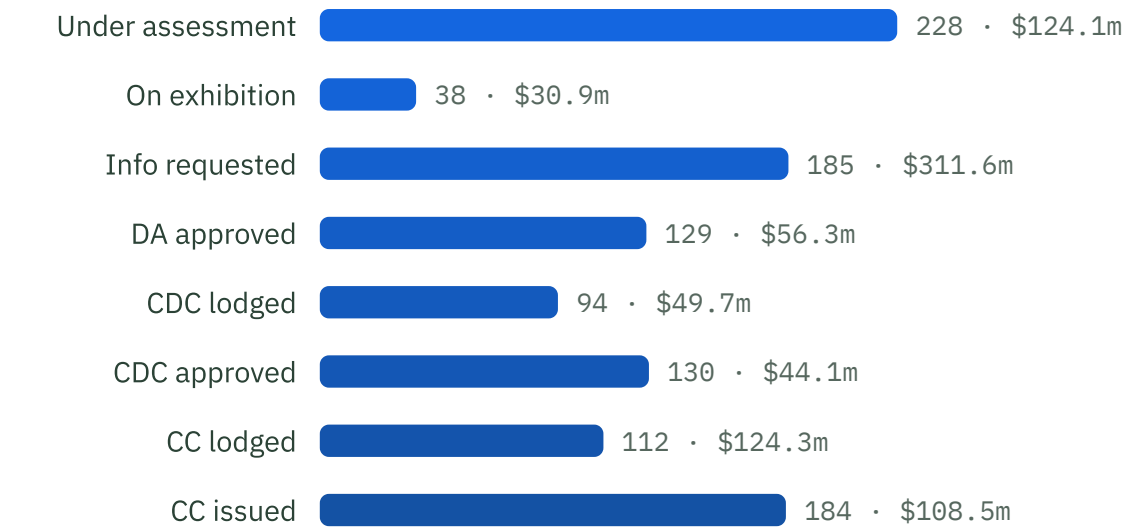

Residential dominates by count; commercial dominates by value.

■ Residential ■ Commercial ■ Industrial ■ Government ■ Infrastructure

Where the fortnight's work sits in the approval pipeline

Count of projects, and verified construction value at each step. Later steps mean sooner work.

By sector

SCORE 55 AND ABOVE

The same fortnight, sorted the way you probably think about your business. Everything below scored 55 or better; the low-value noise — pools, sheds, fences, decks — has been removed.

Builder watchlist

TOP 15 BY TRACKED VALUE

This is the part no council website will give you. Construction certificates name the building company, so over time you can see who is actually building in the Hunter and how much of it. Treat this as your target account list: winning one relationship here is worth more than fifty cold quotes.

#	BUILDER	TRACKED VALUE	JOBS	NEW THIS FORTNIGHT	LARGEST TRACKED PROJECT
01	BLOC CONSTRUCTIONS (NSW) PTY LIMITED Newcastle	\$233.5m	1	0	Mixed use development (351 dwellings), Newcastle West \$233,534,640

Busiest suburbs this fortnight

Verified construction value, then number of projects. Useful for planning a run of site visits in one trip.

The public pipeline

\$6.4BN OF FUNDED WORK

State and federally funded Hunter work does not appear in council development application data, because it runs through separate approval pathways. This section is compiled by hand from the NSW Budget papers and agency announcements. These are the jobs that will still be going in three years.

Hunter-Central Coast Renewable Energy Zone network infrastructure

up to \$3.9bn private investment

Where Upper Hunter to Central Coast, incl. Newcastle, Lake Macquarie, Port Stephens **Stage** Construction from early 2026

Source EnergyCo NSW

Ausgrid selected to design, build, finance, operate and maintain. Adds 1 GW of transfer capacity by 2028. Includes 85 km of sub-transmission line Kurri Kurri to Muswellbrook and 18 km of underground fibre. Forecast average 590 direct construction jobs a year.

WHAT IT MEANS FOR AN ELECTRICIAN

HV transmission and sub-transmission, substations, protection and control, comms and fibre, construction power. Tier-1 principal contractors — target subcontract packages, not the head contract.

John Hunter Health and Innovation Precinct \$890.0m

Where New Lambton Heights, Newcastle **Stage** Funded, delivery underway **Source** NSW Budget 2026-27, Hunter regional paper

Largest single health capital allocation in the region.

WHAT IT MEANS FOR AN ELECTRICIAN

Essential services, UPS and standby generation, AS/NZS 3003 body-protected areas, nurse call, medical gas alarms, data density, specialist lighting, security and access control.

Belmont Desalination Plant \$530.0m

Where Belmont, Lake Macquarie **Stage** Design and construction funded **Source** NSW Budget 2026-27, Hunter regional paper

Hunter Water's permanent desalination capacity.

WHAT IT MEANS FOR AN ELECTRICIAN

HV supply and substation, MCCs and VSDs for high-pressure pumping, SCADA and instrumentation, hazardous-area work, standby generation.

M1 Pacific Motorway extension to Raymond Terrace

\$390 . 5m (2026-27 allocation)

Where

Black Hill to Raymond Terrace

Stage

Under construction

Source

NSW Budget 2026-27, Hunter regional paper

Includes new bridges over the Hunter River.

WHAT IT MEANS FOR AN ELECTRICIAN

Road and high-mast lighting, ITS and variable message signage power, communications pits and conduit, tunnel/underpass services.

Muswellbrook bypass

\$258 . 2m (2026-27 allocation)

Where

Muswellbrook (Upper Hunter — outside core coverage, watch item)

Stage

Works underway

Source

NSW Budget 2026-27, Hunter regional paper

Upper Hunter corridor upgrade programme.

WHAT IT MEANS FOR AN ELECTRICIAN

Road lighting, intersection and signal power, comms infrastructure.

Cessnock Hospital redevelopment

\$138 . 0m

Where

Cessnock

Stage

Redevelopment funded

Source

NSW Budget 2026-27, Hunter regional paper

Full hospital redevelopment in the coverage area.

WHAT IT MEANS FOR AN ELECTRICIAN

Essential and standby supply, body-protected wiring, nurse call, theatre and imaging power, data, security.

Singleton bypass

\$119 . 1m (2026-27 allocation)

Where

Singleton (Upper Hunter — watch item)

Stage

Construction

Source

NSW Budget 2026-27, Hunter regional paper

New Hunter River crossing and bypass alignment.

WHAT IT MEANS FOR AN ELECTRICIAN

Road lighting, signals, comms.

Nelson Bay Road upgrade

\$87 . 4m (2026-27 allocation)

Where

Williamtown to Bobs Farm, Port Stephens

Stage

Construction

Source

NSW Budget 2026-27, Hunter regional paper

Duplication through the Williamtown defence and aerospace corridor.

WHAT IT MEANS FOR AN ELECTRICIAN

Road lighting, intersection power, service relocations, comms conduit.

Flood management asset repairs, Hunter

\$73.1m

Where Across the Hunter valley **Stage** Programme of works **Source** NSW Budget 2026-27, Hunter regional paper

Critical repairs to damaged flood management assets — many small discrete packages rather than one head contract.

WHAT IT MEANS FOR AN ELECTRICIAN

Pump station power and controls, telemetry, switchboards, standby generation. Well suited to mid-size local contractors.

Maitland Integrated Community and Community Mental Health Service

\$22.0m

Where Maitland **Stage** Funded **Source** NSW Budget 2026-27, Hunter regional paper

Plus \$7.5m for the Maitland Hospital car park.

WHAT IT MEANS FOR AN ELECTRICIAN

Consulting-suite power and data, nurse call/duress, lighting controls, car park lighting and EV provision.

Broadmeadow precinct and Newcastle Entertainment Centre planning

\$14.0m (planning)

Where Broadmeadow, Newcastle **Stage** Planning and business case **Source** NSW Budget 2026-27, Hunter regional paper

Early planning money for a precinct expected to generate a very large construction programme. Worth tracking now, not quoting.

WHAT IT MEANS FOR AN ELECTRICIAN

Nothing to quote yet. The value of knowing early is relationship building with the delivery agencies and shortlisted designers.

Net Zero Manufacturing Centre of Excellence, TAFE NSW Tighes Hill

Funded (amount not itemised)

Where Tighes Hill, Newcastle **Stage** Funded **Source** NSW Budget 2026-27, Hunter regional paper

TAFE facility tied to the region's energy transition training pipeline.

WHAT IT MEANS FOR AN ELECTRICIAN

Training-rig power, three-phase distribution, workshop lighting, solar and battery training installations, data.

Where the data comes from

Every council project in this report is drawn from the NSW Planning Portal's ePlanning open data feeds, published by the NSW Department of Planning, Housing and Infrastructure under a Creative Commons Attribution licence and refreshed daily. We pull three separate feeds:

- **Development applications** — the pipeline, typically 6 to 24 months before anyone picks up a tool.
- **Complying development certificates** — fast-tracked work that can start almost immediately.
- **Construction certificates** — the strongest signal there is. A certificate means the job is about to be built, and it often names the building company.

Records for the same address across all three feeds are merged into one project so you see a single entry with its history, not the same job three times.

How the score works

Each project is scored out of 100 from five inputs: the kind of development, how far through approval it is, the declared cost, the distance from Newcastle, and specific high-intent signals such as a named builder, a large dwelling count, or solar and EV scope in the application. Sector and stage do most of the work — a construction certificate for a medical centre outranks a much larger development application for a subdivision, because one needs an electrician in a fortnight and the other in two years.

What is fact and what is our estimate

Fact, straight from the government feed: the address, the development type, the approval stage and dates, the declared cost of development, the dwelling and lot counts, the floor area, the building code class, and the builder's name where a certificate records it.

Our estimate, not a quote: the opportunity score, the electrical share of the cost, the likely scope of works, and the suggested timing. The electrical percentages are industry rules of thumb applied to a declared cost. Use them to rank where to spend your week, never to price a job.

Data quality

Declared costs on planning applications are entered by applicants and are not audited, so the raw feed contains obvious errors — this fortnight it included a two-dwelling development in Nelson Bay lodged at \$1.375 billion. We cross-check every figure against floor area, dwelling count and lot count where the feed supplies them.

- **87%** of costs passed a plausibility cross-check.
- **56** records were flagged as implausible or uncorroborated. They are still listed, because the project is real, but the dollar figure is marked and excluded from every total in this report.
- **110** records lodged no cost at all.

What this report cannot tell you

- Who holds the electrical package. A named builder is a door, not a contract.
- Whether a job is already let. Always ask.
- Private work under the certificate threshold, or maintenance and service work, which never appears in planning data at all.

Verify before you quote

Every entry carries its NSW Planning Portal reference and, where available, the council's own application number. Before you price anything, look the reference up on the council's DA tracker to confirm the current status. Approvals get modified, withdrawn and appealed, and this report is a snapshot dated 21 September 2026.

Sources and licence. Council development data: NSW Planning Portal ePlanning open data APIs, © State of New South Wales (Department of Planning, Housing and Infrastructure), used under a Creative Commons Attribution 4.0 licence. Public pipeline figures: NSW Budget 2026-27 regional papers, EnergyCo NSW, and the sources cited against each item. **Not financial or contractual advice.** Tradiesignal aggregates public records and applies its own scoring. Figures described as estimates are estimates. Verify every project against the primary source before committing time or money.
